

# SmartMech™

*New upgraded version 4.0*

## THE NEXT GENERATION OF CARD READERS

Experience the future of arcade technology with SmartMech, the cutting-edge RFID card reader that will transform your arcade operations. Designed with advanced features and innovative technology, the SmartMech offers an unparalleled player experience while maximizing operational efficiency and revenue.

### DISPLAY AND VIEWING ANGLES

The SmartMech has twice the resolution of previous generations and an In Plane Switching (IPS) display with a world class 170 degree viewing angle, setting a new standard for the industry.

### USER-FRIENDLY TICKET CONFIGURATION

SmartMech's intuitive Electronic-Ticket system, based on our award-winning Game Prep, eliminates errors and increases uptime. The reader automatically detects payout settings and configures itself to work seamlessly with any arcade game.

### SUPERIOR TICKET STREAM

With an improved video driver, SmartMech delivers the best ticket stream in the industry. This enhancement ensures faster and smoother ticket payouts, dramatically enhancing the player experience.

### KEYBOARD EMULATION FOR PC-BASED GAMES

SmartMech manages payments for simulators and attractions that do not support traditional coin and bill acceptors. Use the SmartMech to emulate the strokes of a keyboard to start, stop, pause and replay PC-based games.

### IMPROVED WI-FI CONNECTIVITY

SmartMech's enhanced Wi-Fi capabilities ensure a more reliable connection, facilitating seamless remote management and monitoring. This improvement ensures uninterrupted game play and easy operations.

### OFFER MULTIPLE PRICE POINTS

The addition of our illuminated AC button panel easily allows users to select the amount they want to spend without multiple card taps. Encourage players to continue their game or play another round for a reduced rate.

## THE NEXT GENERATION OF CARD READERS

**SmartMech isn't just an RFID card reader; it is a comprehensive revenue-generating solution that enhances the gaming experience, increases operational efficiency, and boosts customer satisfaction. With SmartMech, running an arcade has never been more rewarding.**

### PAUSE STATION READER MODE

Unlimited Time Play is a great way to add value during a player's visit. Give them the opportunity to have a break and pause their Time Play with the Pause Station mode.

### SERIAL TICKET PAYOUT

SmartMech raises the bar again with an industry-first serial ticket interface which pays Electronic Tickets instantly. This advancement ensures quick and accurate payouts, keeping players engaged.

### VENDING MACHINE CAPABILITY

Increase the payment options for your vending machines with the addition of a SmartMech. This exciting feature allows customers to use their game cards to buy items and prizes, enabling businesses to broaden their revenue streams.

### IMPROVED POWER EFFICIENCY

The reduced power draw extends the life on battery-supported devices, like SliderMech, from 14 days to an impressive 2.5 months. SmartMech minimizes the need for frequent maintenance and service calls.

### PLAY DURING PAYOUT

With the Play During Pay feature, large payouts do not interrupt game play. This function lets your game continue earning while guests win, maximizing revenue and player satisfaction.

### INTEGRATED RELAY & CIRCUIT PROTECTION

The SmartMech's integrated circuit protection safeguards against potential electrical issues, providing a reliable and trouble-free install environment without the need for additional hardware. Coupled with an expanded operating range of up to 24 volts, the SmartMech offers unparalleled versatility, allowing seamless integration with a wide array of equipment.
